The application has been amended as follows:

In claim 7, line 9, after "routine" insert --using a computerized processor--;

In claim 11, line 11, after "determined" insert -- by a computer processor--;

In claim 17, line 9, after "determined" insert -- by a computer processor-

The following is an examiner's statement of reasons for allowance: the prior art including Kovatchev et al., "*Symmetrization of the Blood Glucose Measurement Scale and Its Applications. Diabetes Care*" fails to disclose by itself or in combination a method or apparatus for predicting a near future BG profile and the onset of hypoglycemia wherein HRV history profile is recorded and hypoglycemia prediction module predicts the onset of hypoglycemia-in context with the remaining limitations in the independent claim(s). Additionally, the language in the independent claims added by examiner's amendment is to obviate over a non-statutory subject matter. Specifically, to be part of the useful technological arts the claim recitation must
